

## Strings on the guitar

There are 6 strings on both electric and acoustic guitars. The standard tuning of these is **E, A, D, G, B, E**

A good way to remember them is with the following lines:

**Elephants And Donkeys Grow Big Ears**

or

**Eddie Ate Dynamite Good Bye Eddie**

The thickest (and lowest sounding) string is referred to as '**Bottom E**'

and the thinnest (and highest sounding) is called '**Top E**'.

You will also see the strings referred to by numbers 1-6 as in the diagram above.
